

SODIUM TRIPOLYPHOSPAHTE (STPP)

SPECIFICATION OF PRODUCT:

NO.	ITEM	SPECIFICATION
1	PURITY	94% MIN
2	P2O5	55% MIN
3	PH	9.2 – 10.0
4	WATER INSOLUBLE MATTER	0.1% MAX

APPLICATION/USES: The most common used in powdered detergent formulations has been STPP or **sodium tripolyphosphate**. This compound works well to lift minerals like calcium, magnesium, and iron from fabrics as well as soften water, without forming a precipitate.

PACK SIZE: 25 KGS/BAG

STORAGE: Store in a cool, dry, well-ventilated area away from incompatible substances and keep container tightly closed.
